## How do I know if my pet's teeth need cleaning?

### Ask yourself the following questions:

Yes No

Is your pet over three years old?

Does your pet have bad breath?

Do your pet's teeth (especially the molars) have a yellow or brown discoloration?

Are your pet's gums red or bleeding?

If you answered "Yes" to any of the above questions, your pet is probably suffering from some degree of dental or periodontal disease. Periodontal disease is more than just dirty teeth. If untreated it can cause serious health problems including organ failure.

## What is included in our dental cleaning?

- ⌘ A comprehensive physical exam and bloodwork to minimize any anesthetic risk
- ⌘ Dental procedures performed in a state-of-the-art dental suite
- ⌘ The safest anesthetic agents available in modern veterinary medicine
- ⌘ Electronic monitoring for heart rate, rhythm, blood oxygen levels, CO2 levels, breathing rate, blood pressure and temperature by our certified veterinary technicians
- ⌘ Intravenous fluids to help maintain blood pressure and as a safety precaution
- ⌘ Teeth scaled with an ultrasonic scaler to remove tartar
- ⌘ Polishing teeth to smooth the enamel surface which helps retard plaque accumulation
- ⌘ Fluoride treatment for protection from cavities
- ⌘ Probing for any pockets between your pet's teeth and gums that may cause future problems
- ⌘ Antibiotic injection to prevent bacterial spread to vital organs
- ⌘ Pain medicine if any extractions are necessary
- ⌘ Individual monitoring during recovery by a certified veterinary technician
- ⌘ A 5-pound bag of Prescription Diet t/d and a Dental Care Kit will go home with your pet for your home care program
- ⌘ Digital radiographs to help us assess the health of the tooth roots and surrounding bone

## Home Care & Products

To inhibit tartar build-up

- 🐾 Brushing your pet's teeth is the best method of preventing plaque and tartar from returning!
  - The toothpaste comes in different flavors.
- 🐾 t/d, a unique formulation of kibble, helps to gently scrub away plaque and tartar.
  - It's available for both dogs and cats.
- 🐾 Oxyfresh decreases oral bacteria which can lead to build-up of plaque and tartar and **BAD BREATH!**
  - It is effective and easy to use.
